

OUR PURPOSE

Making people's lives healthier, safer and more fulfilling

Ever since its founding over one hundred years ago, Olympus has continued to make valuable contributions to society through its businesses. Throughout our history, our products and services have not only become essential parts of medicine and life sciences, but have also proved to be indispensable in the fields of manufacturing and infrastructure maintenance. In addition, we fulfill the needs of people worldwide by meeting societal demands.

We have been on a journey to transform Olympus into a global medtech company and steadily build a strong management foundation. This is the driving force for us to help advance society as we aim to improve patient outcomes by elevating the standard of care in targeted disease states. Our journey is entering a new phase as we work to realize sustainable growth throughout the transformation. Please look forward to Olympus delivering on its promises and soaring to new heights.
